and

Preliminary Determination for an Air Quality Permit for

DCP Midstream, LP

DCP Midstream, 370 17th Street, Suite 2500, Denver, CO 80202 has submitted an air quality permit application to the Air Quality Bureau (AQB), New Mexico Environment Department (NMED) for an air quality permit to modify the Golf Course Booster Station. The application file has been assigned Permit No. 0028M5 and TEMPO Agency Interest ID No. 592. The exact location of the facility is at latitude 32 deg., 26 min., 57.1 sec. and longitude -103 deg., 12 min., 52.2 sec. To aid in locating this facility, use the following driving directions: from the intersection of SR-176 (Ave. O) and SR-207 located near the center of Eunice, proceed 3.4 miles west on SR-176 to an access road on the left; turn south and travel 120 yards on the access road to the site. This facility is located approximately 3 miles west of Eunice in Lea County, NM.

The proposed modification will consist of the following:

- Addition of one (1) 500 bbl condensate tank;
- Removal of two (2) existing 300 bbl condensate tanks;
- Revision of VOC emissions from the condensate tank;
- Revision of VOC emissions due to truck loadout of condensate;
- Include allowable permitted emissions for VOC due to Startup, Shutdown, Maintenance (SSM) and Malfunctions.

Total air pollutant emissions to the atmosphere are estimated to be approximately: Nitrogen Oxides (NO_x) expressed as Nitrogen Dioxide (NO₂): 784 tons per year (tpy); Carbon Monoxide (CO): 174 tpy; Volatile Organic Compounds (VOC): 165 tpy; negligible quantities of Sulfur Dioxide (SO₂); Total Suspended Particulate Matter (TSP): 11 tpy, Particulate Matter 10 microns or less (PM₁₀): 11 tpy, Particulate Matter 2.5 microns or less (PM_{2.5}): 11 tpy; VOC due to combined SSM and Malfunction emissions: 10 tpy; Formaldehyde (a Hazardous Air Pollutant, HAP): 12 tpy; and Total HAPs: 13 tpy. These emission estimates could change slightly during the course of the Department's review of the application.

The NMED has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's dispersion modeling analysis indicates that the facility's air emissions will meet the ambient air quality standards for NO₂, CO, SO₂, TSP, PM₁₀, and PM_{2.5}. A full review will evaluate the estimated emission rates and the air quality dispersion modeling analysis to determine compliance with ambient air standards.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 1, 3, 61, 70, 71, 72, 73, 74, and 75; 40 CFR 50; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before November 29, 2011. This source is a major source according to 20.2.74 NMAC, PSD. This permitting action is not a PSD Major Modification.

To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions and production rate, and conditions that will require record keeping and reporting to the Department.

The permit application is available for review in electronic or hard copy at the Air Quality Bureau Office, 1301 Siler Road, Building B, Santa Fe, New Mexico. To arrange viewing of this application contact Teri Waldron, at 505-476-4355 or teri.waldron@state.nm.us. The permit application is also available at the NMED Hobbs Field Office, located at 726 E. Michigan, Ste. 165, Hobbs, NM 88240 for public review.

All interested persons have thirty (30) days from the date this notice is published, to notify the Department in writing of their interest in the permit application. The written comments should refer to the company name, site name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should be mailed to Coleman Smith, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 1301 Siler Road, Building B, Santa Fe, New Mexico 87507-3113.

The Department will notify all persons, who have provided written comments, as to when and where the Department's analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing prior to the end of this first thirty (30) day period will not receive such notification.

If the Department receives written public comment prior to the end of the Department's thirty (30) day public notice, the Department's analysis will be made available for review for thirty (30) days at the NMED district or field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department during this second thirty (30) day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Coleman Smith at 505-476-5550. General information about air quality and the permitting process can be found at the Air Quality Bureau's web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the "Permits" section of this web site.

In accordance with 20.2.72.206.A.4 NMAC, a copy of the public notice will be sent to anyone of the Standing Notification List.
